Q U A R T E R L Y

Of The

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations

$$\frac{dx}{dt} = A(x)u, \quad \frac{dy}{dt} = B(y)v,$$

where $A(x)$ and $B(y)$ are matrices depending on x and y respectively, and u and v are vectors depending on x and y respectively.

2. In the second part of the paper, we consider the case where the matrices $A(x)$ and $B(y)$ are constant matrices, and the vectors u and v are functions of x and y respectively.
